**Class Societies**

ABS=Amercian Bureau of Shipping

LR=Lloyds Register of Shipping

BV=Bureau Veritas

GL=Germanscher Lloyds

DNV=Det Norske Veritas

RINA=Registro Italiano Navale

RMRS=Russian Maritime Register

Note: This list of vessels is derived from the membership information provided on the IAATO website and is intended to show only those ships serving the Antarctic in 2007/08. Not shown are vessels carrying fewer than 12 passengers. Some vessels may have more than one "operator" during the Antarctic season but every attempt has been made to show the principle firm. Ice class data is taken from that provided by the classification societies from their online registers for each vessel listed. In some cases there is no know vessel class information available. Baltic ice class does not include notations for polar icebreakers and their respective ice capabilities. Total capacity includes both passengers and crew. Every effort has been made to ensure accuracy but no warranties of absolute accuracy is given.
